

NEEM FERTILIZER, 800 G

Code: 1110436

Nitrogenous Organic Fertilizer stimulates the rooting - healthier and stronger plants

COMPOSITION

Oilcake N 3

FORMULATION

powder

PACKS

800 g box with propor. Spoon

Charateristics

neem-based fertilizer ideal to prepare the soil at the time of transplanting and sowing. The product combines 4 different actions in one solution: 1) increase of the plant resistance to environmental stress, to diseases and to infections due to soil insects; 2) reactivation of the soil fertility; 3) quick rooting development with consequent increase of nutrients absorption; 4) increase of photosynthesis.

Florlis®

How to use

scatter uniformly on the soil surface or slightly bury, then water. Soil preparation: scatter 80-100 g/m². Preservation: scatter 60-150 g/m² according to the kind of the crop. Trees: scatter 800 g per plant. Potted plants: scatter 10 g (1 spoon) for 20 cm diameter pots, 15 g (1.5 spoons) for 30 cm pots and so on. Repeat the treatment after 15 days.
