

ROSES FERTILIZER, 570 G

Code: 1110622

EC Fertilizer - Fertilizer solution abundant and longer blooms

COMPOSITION

NPK 4-5-7+B+Cu+Fe+Mn+Zn

FORMULATION

liquid.

PACKS

570 g bottle.

Charateristics

the formulation has been studied to feed the main sorts of roses, in order to guarantee a proper root and foliar development as well as abundant blooms. The complete set of micronutrients prevents leaves yellowings due to manganese and iron deficiencies, to which this kind of plant is especially sensitive.

How to use

the content of one cap (30 g) in 3 litres water every 10 days, from the vegetative restarting till the end of the bloom. It is advised to stop fertilizing in autumn/winter.
