

SPECIFIC PRODUCT TO AID THE PLANTS ROOTING, 500 ML

Code: 1130612

For cuttings, transplantings and repottings

FORMULATION

liquid

PACKS

500 ml bottle

Charateristics

this product has been studied on purpose to help the plants to take root. The formulation stimulates the rooting, makes the vegetative restart after transplanting easier, anticipates the growth and the rooting of cuttings.

How to use

prepare a solution diluting the content of one cap (30 ml) in 3 litres water; with 10 litres solution one can treat 20-40 plants to transplant, 80-100 bulbs and 10-15 cuttings.
