

LECITHIN BASIC SUBSTANCE, 100 G

Code: 1130635

100% natural vegetable origin against peach leaf curl

COMPOSITION

100% lecithin

FORMULATION

wettable powder

PACKS

100 g box

Charateristics

it is a product based on lecithin, an active substance present in nature and known for its fungicidal properties. The phospholipids present in the lecithin are able to block the germination of conidia of the fungi, which therefore can no longer pass the cell wall. Specific to fight the peach leaf curl, it also acts against mildew and alternaria leaf spot. It can be used on fruit trees (apple, peach) and vegetables (tomato, endive).

Florlis®

How to use

peach leaf curl, dissolve 75 g of lecithin in 100 liters of hot water. Shake well and sprinkle the plant from a distance of 40-50 cm. Treat every 5 days, for a maximum of 12 treatments. Interval between the last treatment and the fruit picking: 5 days. Mildew, alternaria leaf spot: dissolve 15 g of lecithin in 100 litres of hot water. Shake well and sprinkle the plant from a distance of 40-50 cm. Treat every 5 days, for a maximum of 6 treatments. Interval between the last treatment and the fruit picking: 7 days.
