

CONCENTRATED SOYBEAN OIL, 200 ML

Code: 1130660

Fortifier strengthens the plant defences - Against aphids and whiteflies

COMPOSITION

100% soybean oil. Vegetable oil obtained from the machine pressing, filtering and water dilution of the seeds of Glycine soja. No chemical synthesis processes are involved in production and no GMOs have been used.

FORMULATION

liquid to dilute

PACKS

200 ml pot

Charateristics

the soybean oil, thanks to its antiperspirant properties, helps to improve and strengthen the natural defences of the plants (fortifying action) against insects. Its application is also useful as a protection to keep the correct water balance of the plants, in case of high temperature variations or strong or too warm wind. The soybean oil can be used in fruit-growing, horticulture and gardening. It leaves no residues. For edible crops, it is advisable to allow at least 48 hours after treatment before eating the crop.

Flortis®

How to use

dilute 5 ml in 1 litre water, shake well and sprinkle the plant from a distance of 40-50 cm. Preventive action: treat every 10-15 days, from the beginning of bloom until just before the fruit picking. Curative and protective action: treat when infestations arise and, if necessary, repeat 5-10 days after the first treatment.
