

CONCENTRATED SOYBEAN OIL, 800 ML FOR BOTANICAL USE

Code: 1130663

Fortifier
Strengthens the plant defences - Against aphids
and whiteflies

COMPOSITION

soybean oil 100%

FORMULATION

Liquid to dilute.

PACKS

800 ml pot with measuring cap

Charateristics

Vegetable oil obtained by cold pressing the seeds of Glycine soja (= Dolichos soja), an annual legume native to East Asia. Soybean oil, thanks to its antiperspirant properties, helps to improve and strengthen the natural defences of the plants (fortifying action) against insects. Its application is also useful as a protection to keep the correct water balance of the plants, in case of high temperature variations or strong or too warm wind. The soybean oil can be used in fruit-growing, horticulture and gardening. IT LEAVES NO RESIDUES.

Flortis®

How to use

Dilute 5 ml in 1 litre water, shake well and sprinkle the plant from a distance of 40-50 cm. Preventive action: treat every 10-15 days, from the beginning of bloom until just before the fruit picking. Curative and protective action: treat when infestations arise and, if necessary, repeat 5-10 days after the first treatment.
