

CONCENTRATED PROPOLIS, 150 ML

Code: 1130670

Fortifier strengthens the plant defences

COMPOSITION

propolis extract in aqueous solution. Content of flavonoids, given in galangin, at the time of packaging 50 ml/l. Weight/volume ratio of propolis on finished product 5. Propolis obtained from hydroalcoholic filtering.

FORMULATION

liquid to dilute

PACKS

150 ml pot

Charateristics

natural propolis extract, without additives or artificial colouring. It has an antiseptic and protective fortifying action against fungal diseases (oidium, mildew) and bacteria. Flortis Propolis can be used in fruit-growing, horticulture and gardening at any stage of the production cycle, including bloom. It leaves no residues. For edible crops, it is advisable to allow at least 48 hours after treatment before eating the crop.

Florlis®

How to use

dilute 10 ml in 1 litre water, shake well and sprinkle the plant from a distance of 40-50 cm. Preventive action: treat every 10-15 days, from the beginning of bloom until just before the fruit picking. Curative and protective action: treat when infestations arise and, if necessary, repeat 5-10 days after the first treatment.
