

PROBIOPLANT FOR POTTED PLANTS, 500 ML

Code: 1132000

Top stimulant of growth and vegetative restart

FORMULATION

Liquid

PACKS

500 ml bottle

Charateristics

100% natural probiotic product, for flowering and ornamental potted plants, consisting of natural organic fermented raw materials, extracted from Baltic lakes. It is rich in humic and fulvic acids, amino acids, vitamins, enzymes, mycorrhizae, glomalin and beneficial bacteria. It is ideal for all potted plants, since it helps to: - reactivate the soil fertility which has been impoverished by previous cultivations; - increase the development of roots, flowers and leaves; - avoid filling up with substratum; - reduce repottings.

Florlis®

How to use

each packaging has a measuring cup. Each notch of the cup is equivalent to 10 ml. Dilute 10 ml in 1 litre water (20 ml in 2 litres, 30 ml in 3 litres etc.) and water the plants with this solution. Spread 0.5 l of solution for 20 cm diameter pots, 1 l for 40 cm pots and so on. Repeat treatment every 14 days, for a total of 3 treatments in a row. It is possible to carry out up to 3-4 courses of treatment a year, according to the life cycle of the plant.
