

Florlis®

ANTS DISACCUSTOMER, 1000 ML

Code: 1230710

ideal for lawns, gardens, balconies

FORMULATION

microgranular.

PACKS

1000 ml spreading pot.

Charateristics

the product naturally prevents the presence of ants in the garden, the plants and the houses. It can be used in all places which need to be protected from infestations around gardens and flowerbeds, inside pots and at the front door. It is based on essential oils whose fragrance is unpleasant to ants. The product is not dangerous to people, animals and plants and is not harmful to the environment if used properly.

How to use

plants in pot or in the soil, scatter uniformly on the soil around the plant to protect. Garden, kitchen garden and houses: scatter on the soil setting up a 1-2 cm wide barrier along the whole boundary of the affected area. The effectiveness of the product lasts about one-two weeks: repeat after rains and abundant irrigations which can reduce the effectiveness of the treatment in order to restore the initial conditions.
