

POLYCARBONATE PIGEONS DISSUADER, 150 CM - 96 SPIKES

Code: 1242000

to keep away pigeons and other birds

PACKS

Box with hanger 6 polycarbonate 25 cm bases and 96 stainless-steel spikes

Charateristics

it helps to keep away pigeons and other birds from windowsills, balconies, eaves and roofs in a mechanical way, preventing them from alighting without harming them. It consists of stainless-steel spikes mounted on a transparent, UV-resistant polycarbonate base with a special track for spreading the glue and holes for fastening without glue. It covers up to 1.5 m (96 spikes), can be applied on any surface, is almost invisible after the installation, of easy fastening and maintenance, weather-proof and long-lasting.

How to use

fit the spikes on the base. Clean the surface to protect, then fasten the bases with silicone, screws, expansion plugs, nails, clamps or other suitable way. It is advised to place the dissuader along the perimeter of the area to treat, joining more bases for long surfaces or sectioning the 25 cm bases, following the shaping, in even smaller pieces in order to better protect also small and irregular surfaces.
