

MASTIC WITH COPPER & APPLICATOR BRUSH, 250 G

Code: 1330100

Promotes the resistance of plants to adverse ambient conditions and fungal diseases for all kinds of grafting, cut and plant wound

FORMULATION

flowing paste

PACKS

250 g bottle with handy applicator brush

Charateristics

it's an indispensable product to to heal all kind of plants, trees, shrubs and to protect a wide variety of wounds (cut, pruning, atmospheric agents etc.). The presence of copper makes the formulation unique of its kind with a high curative and preventive power. It improves the resistance of the plant to attacks of fungal diseases and pests. A thin but uniform coating is enough. Once the film has formed, it will protect the treated part of the tree without breaking.

Flortis®

How to use

the product is ready to use; smear a thin coating on the cut (for old wounds a preliminary cleaning is necessary) or around the grafting. The elastic film which will form will protect the part from moulds and bacteria and will aid the cicatrization of the wound.
