

INSECT BARRIER READY-TO-USE GLUE, 200 ML

Code: 1330111

protects from ants, processionary moth, fall webworm

FORMULATION

flowing paste

PACKS

200 ml pot

Charateristics

it's a ready-to-use glue, to be used on the trunks of the plants, in order to keep pests from climbing towards the leaves. The formulation is free of insecticides and solvents and therefore carries out its action respecting the plant ecosystem without being absorbed by the bark, though. With favourable weather, the product is effective up to 3-4 weeks

Period of Use

Florlis®

How to use

smear a 2-4 cm coating along the girth of the trunk, at about 70-100 cm from the ground. Repeat the application when the coating is visibly reduced or covered from foreign material or insects which reduce the adhesion surface.
