How to use

remove the stick from the packing. Light the end, wait a few seconds then blow to extinguish the flame. So you'll get embers which will keep emitting smoke for some hours. Place the stick in the soil, in a flowerpot etc. taking care that the surrounding area is free from inflammables. The smoke of a stick propagates on an area of about 15 m². It is possible to place more sticks spacing them out at least 3-4 m. To stop working, extinguish the end by driving it into the soil.
