

Florlis®

MOUSE GLUE, 135 G

Code: 1330900

to catch mice, cockroaches, ants and other creeping insects

FORMULATION

glue.

PACKS

135 g box.

Charateristics

glue with high adhesive power studied to catch mice, rats and creeping insects like ants or cockroaches without any risk of contamination of the surrounding area. It is particularly suitable for communities (schools, canteens, hospitals) and anywhere the use of chemical rat poisons is not recommended.

How to use

spread the glue on a cardboard or plywood board with a size of at least 30-40 cm and place a bait in the middle (cheese or something else). Put everything in a place where mice or insects pass by.
