

BIOTRAP, 1 UNIT PACK

Code: 1331300

chromotropic biotrap for the eco-friendly defence of fruit-bearing plants

PACKS

1 trap.

Charateristics

it is used in case of infestation of harmful and annoying insects without causing damage to pollinating insects: bees, bumblebees etc.

How to use

to be used with 500 ml or 1.5 l bottles of mineral water. Bottles should be placed south, south-west with respect to fruit-bearing plants, at a height of 2 m from the ground. Not suitable for indoor use and for catching mosquitoes. **WARNINGS:** the traps must be placed in the first sunny days of spring (February/March) so as to fight the generations of breeding insects.
