

WATERPROOF MICE HUT ADHESIVE TRAP

Code: 1331515

Ideal suited for outdoorFor the capture of domestic mice and crawling insects

PACKS

1 trappola

Charateristics

Monitoring adhesive trap to detect the presence of mice (*Mus musculus musculus*, *Mus musculus domesticus*) and crawling insects. It consists of a honeycom frame in polypropylene with a cherry-flavored adhesive cardboard refill, to be placed inside. The trap can be placed directly on the floor, both indoors and outdoors because it is waterproof.

How to use

Assemble the trap according to the instructions shown on the package and place the adhesive sheet on the bottom. Place in the crossing points of mice, insects or near burrows, walls or underneath the furnitures. Place the traps at a distance of 5-10 meters from each other, depending on the possible degree of infestation. Use in protected areas to avoid capture of non-target animals such as reptiles, birds, amphibians and other mammals.
