

THYME EXTRACT RTU, 500 ML

Code: 1331840

Based on thyme extract.
Against mites

COMPOSITION

thyme extract (*Thimus vulgaris*) 1% v/v.

FORMULATION

liquid ready to use

PACKS

500 ml bottle

Charateristics

it is a product based on thyme (*Thimus vulgaris*), an aromatic plant widespread in the regions with a tempered climate. Applied to plants, thanks to its composition rich in flavonoids and phenols, it helps them with their natural defence and to protect themselves from mites. Thyme enters the lymphatic system of the plant, where it creates a protective enzymatic stimulation which produces natural defence substances, moreover it increases the fluidity of the cellular membrane, favouring repair processes and, consequently, healing. It can be used both on ornamental plants and on vegetables and garden plants at any time in the production cycle.

Flortis®

How to use

shake well before use and spray the plant from a distance of 40-50 cm, wetting the entire surface evenly, including the bottom blade of the leaves. Preventive action: treat every 10-15 days, from the beginning of bloom until before the fruit picking. Curative and protective action: treat when the infestations appear and, if necessary, repeat every 7-10 days after the first treatment. For edible crops, it is advisable to allow at least 48 hours after treatment before eating the crop.
