

TRIPLE ACTION SPRAY, 500 ML

Code: 1331860

Against aphids, mites and oidium.
With special and innovative atomizer

COMPOSITION

aloe vera gel extract (Aloe barbadensis Miller) 0.5% v/v, nettle extract (Urtica dioica) 0.5% v/v, thyme extract (Thymus vulgaris) 0.5% v/v.

FORMULATION

Liquid ready to use

PACKS

500 ml bottle.

Florlis®

Charateristics

it is a product based on aloe vera gel extract (*Aloe barbadensis* Miller), nettle extract (*Urtica dioica*) and thyme extract (*Thymus vulgaris*). Applied to the plants, it performs a triple action against insects, mites and diseases. The aloe stimulates the biosynthesis of endogenous natural defence substances (phytoalexins) that strengthen the plant tissues making them more resistant to environmental stress and hindering the development of fungal diseases caused by pathogenic fungi such as oidium, rust and mildew. The stinging substances present in the nettle help the plants to protect themselves from sucking insects, particularly aphids, thrips and whiteflies, while the flavonoids and phenols in the thyme help them with their natural defence against mites. The product also performs a phytostimulant action in case of weakened or stressed plants due to adverse climatic conditions, favouring their growth and making them stronger, greener, with more flowers and fruits. Thanks to the special innovative dispenser, the product atomization is more homogeneous and there is less product loss due to dripping. It can be used on all kinds of plants at any time in the production cycle.

How to use

shake well before use and vaporize the plant from a distance of 30 cm, wetting the entire surface evenly, including the bottom blade of the leaves. Preventive action: treat every 10-15 days, from the beginning of bloom until before the fruit picking. Curative and protective action: treat when the infestations appear and, if necessary, repeat every 7-10 days after the first treatment. For edible crops, it is advisable to allow at least 48 hours after treatment before eating the crop.
