

PROPOLIS RTU, 500 ML AGAINST OIDIUM AND MILDEW

Code: 1331900

Fortifier strengthens the plant defences - Against oidium and mildew

COMPOSITION

propolis extract in aqueous solution. Content of flavonoids, given in galangin, at the time of packaging 0.1 mg/ml. Weight/volume ratio of propolis on finished product 1. Propolis obtained from hydroalcoholic filtering.

FORMULATION

liquid ready-to-use

PACKS

500 ml bottle

Charateristics

natural propolis extract, without additives or artificial colouring. It has an antiseptic and protective fortifying action against fungal diseases (oidium, mildew) and bacteria. Flortis Propolis can be used in fruit-growing, horticulture and gardening at any stage of the production cycle, including bloom. It leaves no residues. For edible crops, it is advisable to allow at least 48 hours after treatment before eating the crop.

Florlis®

How to use

shake well before use and sprinkle the plant from a distance of 40-50 cm. Preventive action: treat every 10-15 days, from the beginning of bloom until just before the fruit picking. Curative and protective action: treat when infestations arise and, if necessary, repeat 5-10 days after the first treatment.
