

SILICA GEL RTU, 500 ML AGAINST BOTRYTIS AND RUST

Code: 1331905

Fortifierstrengthens the plant defences - Against botrytis and rust

COMPOSITION

2% sodium silicate. Product obtained from the processing of amorphous silicates, quartz sand, diatomaceous earth and alike.

FORMULATION

liquid ready to use

PACKS

500 ml bottle

Charateristics

applied on plants, it helps to improve and enhance their natural defences, as its application drastically reduces moisture from the air and helps to prevent the diseases favoured by moisture, such as botrytis, rust and other diseases of fungal origin. It can be used in fruit-growing (vine, strawberry, peach), horticulture (tomato) and gardening (rose, geranium) at any stage of the production cycle. It leaves no residues. For edible crops, it is advisable to allow at least 48 hours after treatment before eating the crop.

Florlis®

How to use

shake well before use and sprinkle the plant from a distance of 40-50 cm. Preventive action: treat every 10-15 days, from the beginning of bloom until just before the fruit picking. Curative and protective action: treat when infestations arise and, if necessary, repeat 5-10 days after the first treatment.
