

Florlis®

FOLIAR SUPPLEMENT FOR ORCHIDS, 250 ML

Code: 1331995

With iron and propolis ensures a perfect hydration and creates the right humidity suitable also for Tillandsia

FORMULATION

liquid ready to use.

PACKS

250 ml bottle.

Charateristics

it ensures a perfect hydration of orchids creating so the ideal habitat for their development. Orchids are tropical plants that require much light for growing, an average temperature between 15 and 18 °C and above all a humidity between 50 and 70%. This way orchids grow more beautiful and with more flowers. The special formulation prevents the formation of limescale droplets on leaves, which are created with the use of normal mains water, and the particular atomizing spray mist simulates the natural mist of the zones of origin of orchids. The presence of EDTA chelated iron helps the orchids to supplement possible deficiencies of iron, which is important to activate photosynthesis. The leaves become greener and orchids grow more vigorous. Last but not least, the presence of natural propolis helps the plants to protect themselves from diseases and to grow healthier and stronger. The product is recommended for all potted orchids and also for Tillandsia.

Period of Use

JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC

Florlis®

How to use

shake before use. Vaporize the product evenly on the leaves, being careful not to wet the flowers. Treat once a week, preferably early in the morning. Do not treat the plants in full sun. This product doesn't replace normal watering but serves as a supplement to keep orchids healthy.
