

INSECT KILLER ELECTRIC SWATTER

Code: 1335545

Mosquito repellent device with rechargeable batteries, which can also be used as a UV lamp.
Color: silver and lime green

PACKS

1 unit packing

Charateristics

Electronic swatter with electric shock generator to eliminate mosquitoes, flies, gnats and horseflies without the use of chemicals. It works with 3 rechargeable batteries, included in the package. Package contains a base which can be used to charge the swatter batteries, but also phones, tablets or other devices. The swatter placed on the base and plugged into an electrical outlet with the included USB cable, it also functions as a UV lamp.

How to use

Insert the 3 batteries inside the seat contained in the swatter's handle. Put the switch to ON position. Hit the insect with the swatter, electric shocks will kill it. After use, turn the switch back to OFF. To recharge the batteries or use the racket as a UV lamp, place it in the base, connect the USB cable to the power socket and turn button to ON position.
