

# MOLES DISACCUSTOMER, 1000 ML

**Code: 1337200**

ideal for lawns, gardens, kitchen gardens

## FORMULATION

microgranulated.

## PACKS

1000 ml spreading pot.

## Charateristics

the product naturally prevents the presence of moles and coypu in lawns and gardens thanks to its special formulation based on essential oils whose fragrance is unpleasant to these animals. The product can be used in all places where it is necessary to prevent the infestation (gardens, lawns, kitchen gardens etc.). The product is not dangerous to people, animals and plants and is not harmful to the environment if used properly

## How to use

scatter about 50-65 g on the affected area, inside tunnels and their entrances, or set up a protective strip about 5 cm wide around the affected area to stop the entrance to animals. The effectiveness lasts about 2-3 weeks. Rains and abundant irrigations can reduce the effectiveness of the treatment. Use from February to November.
