

SUBSTRATUM FOR ACIDOPHIL PLANTS, 20 LITERS

Code: 1340755

Basic growing substratum with pH corrector

COMPOSITION

black peat, acid peat. PEAT CONTENT (volume percentage): 100% pH (in water): 3 TOTAL POROUSNESS: 90%

PACKS

20 l sack

Charateristics

substratum studied on purpose according to the specific needs of those plants which don't tolerate calcareous soils like azaleas, rhododendrons, camellias, ferns, blue hydrangeas, gardenias, lilies, conifers etc. Such plants in fact have a preference for soils which are acid, loose, well drained and rich in micronutrients. The product can be used both for repottings and for planting out acidophil plants in gardens.
