

SUBSTRATUM FOR GERANIUMS, 20 LITERS

Code: 1340770

Basic growing substratum
with clay

COMPOSITION

black peat, blond peat, clay. PEAT CONTENT
(volume percentage): 95% pH (in water): 6.5
ELECTRIC CONDUCTIVITY: 0.30 dS/m DRY
APPARENT DENSITY: 180 kg/m³ TOTAL
POROUSNESS: 90%

PACKS

20 l sack

Charateristics

substratum studied on purpose to provide the best conditions to the development of geraniums; they need in fact a good availability of water and nutrients, but above all a proper soil structure, the essential condition for a good development of the roots. The presence of clay improves the air capacity and the water retention of the mixture, for the achievement of excellent results.
