PACKS

20 l sack

Charateristics

product composed of raw materials of vegetable origin, selected and mixed according to the most modern criteria for the manufacturing of growing substrata. Particularly suitable for repottings of all ornamental and flowering plants, indoors and outdoors, or in addition to the soil of gardens and kitchen gardens in order to improve their structure. The 'respiration flakes', consisting of water sensible material, prevent the formation of moulds and aid a balanced water contribution to the root apparatus of the plants.
