

SEEDING AND CUTTING SUBSTRATUM, 45 LITERS

Code: 1340870

Basic growing substratum, ideal to help seeding and transplanting.

COMPOSITION

blond peat, German black peat, mycorrhizae. PEAT CONTENT (volume percentage): 100% pH (in water): 6.5 ELECTRIC CONDUCTIVITY: 0.30 dS/m DRY APPARENT DENSITY: 200 kg/m³ TOTAL POROUSNESS: 90%

PACKS

45 l sack

Charateristics

substratum made up of a mixture of selected peats, ideal to help seeding and transplanting. Its formulation contains complete nutrients needed by new seedbeds and supports the taking root and development of the root apparatus. The contribution of mycorrhizae, a natural product consisting of micro-organisms which live symbiotically with the roots, aids the absorption of nutrients from the soil, increases the resistance to adversities and promotes a greater development of the roots.
