

CYMBIDIUM ORCHIDS SUBSTRATE, 2 LITERS

Code: 1343030

Simple vegetal non composted soil conditioner with bark

COMPOSITION

maritime pine bark and blond peat

PACKS

2 liters bag

Charateristics

Product specially designed according to the characteristics required by Cymbidium orchids and all terrestrial orchid species with firm roots in the soil (Paphiopedilum, Cypripedium, Bletilla). It is obtained from a careful blend of maritime pine bark (grain size 5-15 mm) which guarantees good ventilation and good drainage, mixed with a percentage of peat to ensure proper anchoring and root growth.

How to use

Use the product when repotting, that should be done for best results at the the vegetative re-growth. Ensure good drainage to the plant by placing a layer of expanded clay on the bottom of the pot, than add this specific substrate for orchids leaving the collar of the plant is 1-2 cm below the pot's edge Then compress the substrate making sure that it adheres to the roots.
