

CARNIVOROUS PLANTS SUBSTRATE, 2 LITERS

Code: 1343090

Basic growing substratum
with respiration flakes

COMPOSITION

blond acid peat, neutral peat and perlite

PACKS

2 liters bag

Charateristics

Substrate based on acid blonde peat which adds softness and an acid pH that is essential for the growing of these plants. The respiration flakes, composed of perlite, favor a balanced water supply to the root system of plants.

How to use

Use the quantity necessary for each repotting. As a general rule, we recommend to repot the Dionea every year, in Spring.
