

Florlis®

## SUMMER-AUTUMN FERTILIZER, 4 KG

Code: 2110606

EC Fertilizer contains nitrogen with programmed release and magnesium

### COMPOSITION

NPK (Mg) 9-9-12 (5)

### FORMULATION

Granulated.

### PACKS

4 kg sack.

## Charateristics

special fertilizer, studied on purpose in order to give the lawn all nutrients needed during summer and autumn. In this period fertilizing must help the lawn to strengthen its tissues, especially the roots, to stand the high temperatures and to prepare it to get through the rigours of winter, avoiding to overstimulate the vegetative growth. The high content of potassium has the effect of increasing the resistance to high and low temperatures and, together with magnesium, of keeping a high photosynthetic activity even in poor brightness conditions, for a greener lawn. The nitrogen with programmed release ensures a gradual and balanced feeding for 4 months.
