

Florlis®

REGENERATION AND SOWING FERTILIZER, 4 KG

Code: 2110621

EC Fertilizer contains nitrogen with programmed release

COMPOSITION

NPK 16-24-12

FORMULATION

granulated.

PACKS

4 kg sack.

Charateristics

special fertilizer, studied on purpose in order to give the soil the food needed for a very good germination, rooting and growth of the lawn at the time of the regeneration or sowing. The high content of phosphorus allows an optimum rooting and consequent development of the root system. The nitrogen with prompt release encourages a quick germination of the seeds (starter effect) whereas the presence of 5 units of nitrogen with programmed release ensures a gradual and balanced feeding for over 4 months.

Flortis®

How to use

scatter uniformly at a depth of 2- 3 cm on the area to regenerate or on the whole surface to sow right before sowing, with a dose of 20 g/m² (one handful is about 30-40 g); then water.
