

Florlis®

CALCIUM NITRATE FERTILIZER, 4 KG

Code: 2113100

EC Fertilizer prevents blossom-end rot and bitter pit

COMPOSITION

N 15,5 + CaO 26,3

FORMULATION

granulated

PACKS

4 kg sack

Charateristics

fertilizer based on nitric nitrogen with quick effect, which acts as a starter on crops, performs a remarkable antiasphyxiating action on moist or firm soils and reduces the damage caused by cold weather. Thanks to the calcium it improves also the consistency of vegetable tissues and the organoleptic standards. Moreover it prevents physiopathologies like blossom-end rot and bitter pit from arising. Ideal for vegetables, orchards and gardens.

How to use

scatter 30-50 g/m² (about one handful) to achieve a prompt result.
