

GRÜN LAWN FERTILIZER, 25 KG

Code: 2113652

EC fertilizergreening effect - contains nitrogen with programmed release - professional formulation

COMPOSITION

NPK (Mg) 19-5-8 (2)+Fe 0,6

FORMULATION

Granulated.

PACKS

25 kg sack.

Charateristics

formulation of professional quality for the lawn which guarantees two results at the same time: 1) the portion with normal release has a prompt effect and allows a fast recovery and an earlier start of the lawn vegetation, even with precocious spring use; 2) the portion with programmed release supplies a balanced feeding for a long period, saving time (fewer treatments) and product (fewer losses due to leaching). The release happens gradually in contact with the soil and guarantees the right nutritive contribution for over 4 months (at an average soil temperature of 21 °C). The proper balance of nitrogen, phosphorus and potassium ensures a good vegetation and a strong development of the root apparatus, increasing the resistance to trampling. Moreover the product is enriched with iron and magnesium to protect the lawn from leaf yellowing.

Florlis®

How to use

scatter uniformly on the soil with a dose of 20- 40 g/m² (one handful is about 30-40 g); then water. Carry out a second treatment after 4 months.
