

# THE PLANT THIRST-QUENCHER GEL POCKET

**Code: 5400050**

for a gradual water release up to 30 days

## FORMULATION

gel

## PACKS

220 mlDoypack

## Charateristics

the Plant thirst-quencher Pocket is a gel composed of water and vegetable fibres, capable of releasing its water content gradually, ensuring therefore an availability up to 30 days (at a temperature of 20 °C).

## How to use

water the soil abundantly before using the product. Cut the bag and lean it or bury it slightly in the moistened soil. Use one bag for 15 cm diameter pots, 2 bags for 25 cm pots and and so on.
